

— 02 QUESTION BANK

QUESTION BANK

INITIAL REQUIREMENTS DISCOVERY MEETING

Project : Compliance Monitoring System

Date : June 23, 2026

Prepared By : Vaisakh Rajan — Business Analyst

Purpose : Open ended questions to guide the JAD session and capture business requirements

Note : These questions are generic and open ended. The goal is to let the business speak freely without being led toward any specific solution.

TOOL USED FOR PREPARATION

This question bank was generated using Claude AI as a preparation tool for the JAD session.

All questions were reviewed and validated by Vaisakh Rajan — Business Analyst — before the meeting.

Questions were selected and organised based on the meeting agenda topics and general BA elicitation best practices.

SECTION 1 — CURRENT SITUATION

These questions help the BA understand how things work today before any solution is discussed.

1. Can you walk me through your current compliance monitoring process from start to end?
 2. What does a typical day look like for your compliance team?
 3. What systems and tools does your team currently use for compliance monitoring?
 4. How many people are involved in the compliance monitoring process?
 5. How long does your current process take from start to end on a daily basis?
 6. How do you currently receive and handle compliance data?
-

SECTION 2 — PAIN POINTS AND CHALLENGES

These questions help the BA identify what is not working in the current process.

1. What is your biggest challenge with the current compliance monitoring process?
 2. What keeps you up at night from a compliance perspective?
 3. Where do things most commonly go wrong in your current process?
 4. What tasks consume the most time in your team's daily routine?
 5. Have you ever faced regulatory observations or penalties related to compliance monitoring? What were the reasons?
 6. What have you tried before to solve these problems and why did it not work?
-

SECTION 3 — STAKEHOLDER NEEDS

These questions help the BA understand who needs what from the solution.

1. Who are the key people affected by this compliance monitoring problem?
 2. What does your team need to see every morning to do their job effectively?
 3. What does your management need to see for reporting and decision making?
 4. What does a regulator or auditor typically ask for during an inspection?
 5. Are there other teams or departments that need visibility into compliance data?
 6. If you could wave a magic wand and have the perfect solution tomorrow morning — what would it look like?
-

SECTION 4 — DATA AND SYSTEMS

These questions help the BA understand the data landscape without assuming anything.

1. What data do you need to do your compliance monitoring effectively?
 2. Where does this data currently come from?
 3. In what format do you receive this data?
 4. How frequently do you need this data updated?
 5. Are there any challenges with getting the data you need when you need it?
 6. Do you have any concerns about data security or confidentiality?
-

SECTION 5 — SOLUTION EXPECTATIONS

These questions help the BA understand what the business expects from the solution.

1. What does success look like for you at the end of this project?
 2. What improvements do you expect to see in your team's daily work?
 3. How will you know if this solution is working correctly?
 4. Are there any tools or technologies your team is already comfortable with that you would prefer to use?
 5. Are there any tools or technologies you want to avoid?
 6. What would make you say this project was a complete failure?
-

SECTION 6 — CONSTRAINTS AND LIMITATIONS

These questions help the BA identify boundaries the solution must work within.

1. Are there any budget limitations for this project?
2. Are there any technology or infrastructure constraints we should be aware of?
3. Are there any regulatory requirements that the solution must comply with?
4. Are there any timeline pressures driving this project?
5. Are there any organisational constraints — policies, approvals, or processes — that might affect this project?

SECTION 7 — TIMELINE AND PRIORITIES

These questions help the BA understand urgency and phasing.

1. When do you need this solution to be ready?
2. Are there any specific deadlines driving the timeline?
3. If we had to deliver this in phases — what is the one thing you absolutely need first?
4. What can wait for a later phase?
5. How much time can your team dedicate to testing and validating the solution before go live?

SECTION 8 — SIGN OFF AND GOVERNANCE

These questions help the BA understand the approval process.

1. Who needs to approve the final solution before it goes live?
2. How many levels of approval are required?
3. Who is the ultimate decision maker for this project?
4. How would you like to be kept updated on progress during the project?
5. What level of involvement do you expect from your team during the build phase?

ADDITIONAL PROBING QUESTIONS

Use these if the conversation stalls or needs to go deeper.

1. Can you give me a specific example of when this problem caused a real issue?
 2. How does this problem affect your team's morale and productivity?
 3. If this problem is not solved — what happens in the next 6 months?
 4. Who else should I speak to better understand this problem?
 5. Is there anything else you think I should know that we have not covered?
-

INTERVIEWER NOTES

- Listen more than you speak
 - Never suggest a solution during this session
 - Probe deeper with follow up questions — tell me more, can you elaborate, what do you mean by that
 - Note body language and emphasis — what the business stresses most is usually the most important requirement
 - Capture exact words used by business — use their language in the BRD not yours
 - If something is unclear — ask immediately do not assume
-
